

# Pleasant Hill Weather Watch

Welcome to the City of Pleasant Hill's Weather Watch site. This forecast information from the National Weather Service (NWS) is provided to keep Pleasant Hill residents up-to-date on winter weather systems that may produce precipitation in the East Bay. This information is intended to complement the many sources (newspapers, radio, television, and on-line) currently available to track winter weather conditions.

**Latest Update:** Tuesday morning, February 20<sup>th</sup>

Low clouds have moved into the San Francisco and Monterey Bay areas resulting in milder morning temperatures. A cold front is moving slowly from the Gulf of Alaska south into Oregon bringing wet and cooler weather. Today should be dry as the cold front begins to reach the northern part of the region. Rain is likely in the North Bay tonight and the East Bay on Wednesday as the storm system pushes south. Rain is expected to be heavy at times, as the system moves across the region.

On Thursday and into Friday, the NWS forecasts showers and isolated thunderstorms with snow levels dropping to or below 2500 feet Thursday night. A snow advisory is possible in the Coastal Mountains and will be posted if warranted. On Friday the showers should end for a short time but a few showers are possible on Saturday/Saturday night. The temperatures are expected to remain on the cooler side through the weekend and into next week with the potential for more cold wet weather by the middle of next week.
